

TITLE X NATIONAL OVERVIEW

Every \$1 Invested Saves \$7

Every \$1 invested in publicly-funded family planning and related services saves taxpayers more than \$7 by helping avert costs related to unintended pregnancies. \$84 million are saved from early treatment and prevention of STDs/HIV, and life-saving cancer screenings at Title X-funded health centers across the country.

Title X Program Background

Established by Congress in 1970 with broad bi-partisan support, the Title X federal family planning program supports the delivery of high-quality family planning and related services to over 4,000,000 low-income and uninsured individuals nationwide who may otherwise lack access to care.

The Title X program is administered by the Office of Population Affairs (OPA) within the Department of Health and Human Services.

Title X Family Planning Services

Title X funded services include:

- Contraceptive care
- Pregnancy testing
- STD + HIV prevention education, counseling, testing +treatment
- Adolescent services
- Infertility services
- Pregnancy testing +options counseling

Funds may also be used for outreach and education efforts that link community members to care.

Title X funding may not be used to provide abortion services.

6 in 10 WOMEN

who obtain services from a family planning health center consider it their usual source of health care.
